**What is a Comma Separated File or csv file?**

csv file is a format of file in which we store every record as a line.

For example we have a table as below

| Rollno | Name | Marks |
|--------|-------|-------|
| 1 | Raman | 90 |
| 2 | Aman | 56 |
| 3 | Anil | 78 |

So csv file for the above table will be

1,Raman,90

2,Aman,56

3,Anil,78

CSV File or a Comma Separated file has an extension of (.csv)

every column in the record is separated by a comma and every record is a line.
